Smart Thermostat Requirements:

- Occupancy and/or proximity sensors that can tell if a person is away to conserve energy when they are not home.
- Learning algorithms that avoid the need to program a set schedule.
- Ability for homeowners to control the heating and cooling system remotely through wireless apps on their phones or tablet, which is especially valuable for homeowners with second homes.

- Feedback notifications on the energy-saving potential of your thermostat set point and other efficient settings.
- Ability to monitor previous electric usage data, and having smarter control of your heating and cooling system when it's not needed at full capacity.
- Installed thermostat must:
 - Be on the **BPA Smart Thermostat Qualified Products List** (<https://www.bpa.gov/EE/Policy/Manual/Pages/IM-Document-Library.aspx>).
 - Have occupancy detection set to on, and
 - If the thermostat controls a heat pump, be programmed to control a heat pump.
- All thermostats, except those in bathrooms, must be replaced to qualify.
